Faculty Positions in Biomedical Engineering

Position: The Department of Biomedical Engineering at the University of Massachusetts, Amherst invites applications for multiple tenure/tenure-track faculty positions at the assistant and associate professor ranks in the areas of biomaterials, bioinstrumentation, and biomechanics.

Starting Date: August 1, 2019

Requirements and Qualifications: Candidates must have an earned doctorate in Biomedical Engineering or related field. Postdoctoral research experience is desired for the rank of assistant professor. For associate professors, the successful candidate will have a strong record of teaching, research, and extramural funding. Applicants with research and teaching expertise in areas of biomaterials for devices and regenerative medicine or biosensors and bioinstrumentation are especially encouraged.

Responsibilities: The faculty candidates are expected to teach both undergraduate and graduate courses; supervise graduate students and postdoctoral fellows, develop a nationally recognized program of sponsored research, and have an understanding of diversity issues and their educational importance.

Department, School, Institute, University and Community: The Department of Biomedical Engineering (http://bme.umass.edu) was established in 2017 and will be hiring 12 tenure track faculty over the next 5 years. Thus, successful candidates will have the opportunity to help shape the growth of the new department. The department will leverage synergies with the new Institute of Applied Life Sciences (IALS: http://umass.edu/ials), and the UMass Medical School (http://umassmed.edu).

Application Process: Applications will be considered until the positions are filled; however, applications should be received by October 31, 2018 to ensure full consideration. The full advertisement can be found at http://careers.umass.edu/amherst/en-us/job/495205. Questions about the positions can be directed to swdonahue@umass.edu.
